Our Process

- **Discovery:** We work with your team to understand the scope of work, dependencies, goals and Key Performance Indicators (KPI's).
- **Estimation:** Based on documentation goals and requirements, we provide an estimate for the work required to implement your product.
- **In-depth Requirements:** Once the contract is signed, we create in-depth user stories and flow diagrams for each functionality the team will implement.
- **Quality Analysis:** We use rigorous end-to-end testing to ensure everything has been implemented successfully and perform regression testing, performance testing and everything in between.

+91-9461101915

- **Development:** After proposed functionalities and designs are approved by the client, our developers create high quality code, module by module.
- **UI/UX Design:** Once all requirements are documented, the team will create wireframes, prototypes and high-fidelity design comps to share with our clients.
- **Production Release:** We use application release automation and continuous integration tool to ensure your release management cycle goes as planned and that your application is launched bug-free.
- **Thorough Documentation:** We product in-depth release notes, flow diagrams and API documentation for each line of code written, ensuring that any developer can quickly get up to speed with our work.
- **Post Release Monitoring:** Once your application is launched to production, we do sanity testing to make sure everything works as expected, monitoring the vital signs of your app as it is being used by real users.
- **Ongoing Support:** If you need additional technical support such as troubleshooting, mobile app monitoring and bug fixes - or if you wish to develop additional features and functionalities - we are here to help.

Our Work (Android App Development)

UAE Consular Section App

A UAE Embassy India's Official app to track visa appointment status. This app provides every small and detailed information about the procedures and counter measures a user should know while applying for Visa. This is an informative and very helpful app for users to take an appointment for Visa .

Parental App : Concern4U

This app was created for those who are concerned about the security of their children. With this app parents/user can check the activities done on the other device in which they have installed the tracking app. It helps them to see if their kids are in touch with wrong person or doing/searching for wrong content on the internet or watching wrong content on the internet, their kids locations etc.

Bath Products : Gravity App

GRAVITY in-house award winning style team is well integrated in its approach and helps to supply 20000 faucets per day. Our state-of-the art producing unit's area unit backed by a world category testing research lab. That's why GRAVITY faucets adjust to the very best quality and regulative standards. GRAVITY passion for perfection reflects within the seven years of assurance it extends on its faucets.

Online Food : Yummy Cart

The one point hub for ordering delicacies and speciality food items from across India. Yummycart has been created as a bridge between the specialty food items and those who relish them - that's why our tagline says.

Custom Shirts : Shirtinator

Shirtinator is one of Europe's leading online providers of customised textiles and personalised gifts such as custom t-shirts and hoodies, personalised mugs, and much more. At Shirtinator, all you need are some creative ideas and you are just a few clicks away from a unique, personalised gift. You can upload a photo to have printed on a t-shirt, or just type in your personal slogan on the front of a hoody. Or on the back. Or anywhere, really: you design it and we print it! And Shirtinator provides outstanding printing quality at all times.

Real Estate : Lotus Greens

We dare to imagine a world where all can LIVE THE DIFFERENCE We believe that beauty and purity can change lives for the better. We draw our inspiration from the lotus plant, which can live for over a thousand years
