Cell ID Grabber Hardware & Software

(Route & Spot Cell ids)

CELL ID GRABBER is a **tower Cell-ID** tracking hardware & software developed by Avenging Security, an India based Cyber Security Firm.

What is a Cell ID Locator?

A Cell ID locator is a tool used to track down the unique identification number of a cell tower or the "cell ID" of that tower. LIS Cell ID Grabber is available in the market to track all types of radio frequencies namely 2G, 3G and 4G

Why do we specifically suggest trying out our product: "Cell ID Grabber"?

1. We have the only hardware out there in the market that will help you to track down the cell ids of all the radiofrequencies in one piece of hardware.
2. We have the most user-friendly hardware on the market.
3. Ours is the most compact and convenient of all the products out there, weighing just a few grams at best.
4. Ours is the ideal combo of speed and perfection. Our hardware is exceptionally fast with accuracy over 90%.
5. Ours pocket friendly price tag.
6. We provide 24*7 support.

How to use our software?

As said earlier, the CELL ID GRABBER developed by our company, LIS Cell ID Grabber is the most convenient tool you will grab your hands on. Our product neither requires huge technical expertise, nor requires an

ambitious setup. You can just use our hardware & software in the four following ways:

1. Plug in the hardware through the USB ports of your laptop.
2. Open our windows application for the Cell ID Grabber.
3. Select which radiofrequency you want to track.
4. The process of tracking will roughly take around 30 mins.
5. And you are done. The app will show the results in Excel format. You can save and print the results if you want.

Key Points:

1. Capable to get: 2G / 3G / 4G cell id's of all telecom service provider's.

2. Mode: Route & Spot both are available under one cost.

2. No Sim Required

3. Very easy to operate the software and hardware

4. Output format: excel file

5. No Internet Required

Brand	LIS Cell ID Grabber
Manufacturer	Avenging Security Private Limited
Hardware Platform	PC & Laptop only
Software	Java based
Compatibility	Windows 7,8,10 of computers and laptop / computers only
Item Weight	91 grams
Technology	GSM(2G), 3G, LTE(4G)
Warranty	1 year
Accidental warranty	0 year
Package include	Hardware: 1 piece LTE Antenna: 2 pieces

Comparison with other available in market

S.no	Ours	Other's
1.	**No SIM** required.	**SIM** required.

About us

We, Avenging Security Private Limited is in the field of Cyber Security and Investigation from last 10 year which offer industry-leading expertise and the full range of high-end services and cyber Security products to enable organizations meet their information security, business continuity and compliance imperatives.

Our Core Values:

- Under-Committing and Over-Delivering Approach
- Latest Methodologies and 100% Tested resources
- Out-of-the-box thinking and personal excellence
- No compromise with quality of work at any point of time
- Honesty and Integrity
- Team work based conducive work friendly environment for employees

Key Differentiators

Our service offerings include providing an expert, independent and unbiased view of organization's risk, and compliance and security postures with on-demand expertise covering the entire information security value chain and at all layers. We bring the following best in industry professional experts to our customers, which add value at each layer of information security value chain.

Our expertise:

- Automation in cyber crime investigation.
- IoT Development.
- Web / Mobile Application Penetration testing
- Network Penetration Testing
- API penetration testing.
- Information Securities Assessment and Implementation
- Remote Secure Access Solution
- Cloud Web security
- Multi Factor Authentication

Experienced and Qualified Security Team

Our strength is our security researchers, and we believe that if we have consultants who are motivated, trained, and qualified, we will automatically be able to fulfill our commitments to our clients. All the technical as well as management team members have at least 5-6 years of experience in their own domain.
