LIS CDR / TDR / IPDR Analysis

LIS Software is basically **Call Detail, Tower Dump & Internet Protocol Data Record analysis software** developed by **Avenging Security Private Limited**, an India based Cyber Security & IT Firm

So this inevitably leads us to the question, **what is CDR/ TDR & IPDR Analysis Software?**
CDR / TDR & IPDR Analysis Software is basically software that analyze the Call Records / Tower Dump also called BTS Dump and IP Data record of a specific number / Cell id or IP Address respectively.

This brings us to the next inevitable question, **what makes LIS product different from the rest of the products available on the market?**
Well, there is not one single reason but multiple sets of reasons why LIS product is the best and number one goes to.

1) LIS is based on a vast range of databases which provides the client better resources to work with
2) The algorithm used by software is fast and efficient.
3) LIS software can automatically detect the type of calls and bulk sms sms received from a specific number thus making the investigation a lot easier.
4) LIS product offers the client 24*7 support. Moreover Avenging Security Pvt Ltd has a team of experts on board 24*7 ready for any type of remote assistance. Therefore, when you purchase our product, you'll have access to some extra manpower you might need in case you need it.

Features for CDR:

About us

We, Avenging Security Private Limited is in the field of Cyber Security and Investigation from last 10 year which offer industry-leading expertise and the full range of high-end services and cyber Security products to enable organizations meet their information security, business continuity and compliance imperatives.

Our Core Values:

- Under-Committing and Over-Delivering Approach
- Latest Methodologies and 100% Tested resources
- Out-of-the-box thinking and personal excellence
- No compromise with quality of work at any point of time
- Honesty and Integrity
- Team work based conducive work friendly environment for employees

Key Differentiators

Our service offerings include providing an expert, independent and unbiased view of organization's risk, and compliance and security postures with on-demand expertise covering the entire information security value chain and at all layers. We bring the following best in industry professional experts to our customers, which add value at each layer of information security value chain.

Our expertise:

- Automation in cyber crime investigation.
- IoT Development.
- Web / Mobile Application Penetration testing
- Network Penetration Testing
- API penetration testing.

- Information Securities Assessment and Implementation
- Remote Secure Access Solution
- Cloud Web security
- Multi Factor Authentication

Experienced and Qualified Security Team

Our strength is our security researchers, and we believe that if we have consultants who are motivated, trained, and qualified, we will automatically be able to fulfill our commitments to our clients. All the technical as well as management team members have at least 5-6 years of experience in their own domain.
